

# MARBLE SHADOW

TOUR 2023/ 2024

# BIOGRAFÍA

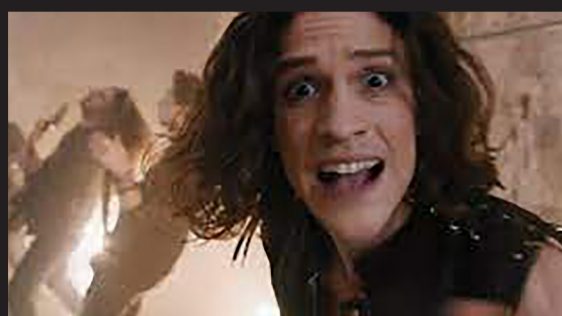

Marble shadow is a power metal project that's been fighting for years to establish themselves as a band of the local scene and, despite having undergone changes and tragic losses, and not being able to present their first work for three years due to the pandemic, is finally prepared to conquer the stages.

Their first album, "The Real World", caused sensation among the media due to their versatility and creative freedom, incorporating touches of many genres and balades with great melodic power, and proving that the band is a more than successful option for any kind of musical events, inside and outside of metal.

The lives show that their strength is in their staging and the interaction with the public, motivated at all times. Mobile flashlights, choruses sung at the top of their lungs, underwear and screams filling the stage during the show, receiving the best reviews from the public even when they aren't fans of the genre.

Marble Shadow is a bet to amuse and excite the public, and a guarantee to turn a concert into a shared experience which breaks down the barriers between musicians and audience and leaves its mark.
